Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 April 2005.

DETAILED ACTION

Response to Arguments

Applicant's amendment filed on April 29, 2005 has been entered and made of record.

Applicant's arguments with regards to claims 1 and 13 have been considered, but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-7 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang et al. (U.S. Patent No. 5,694,315).

Regarding claim 1, Huang discloses a template for a scanner system, the template comprising: a template body adapted to receive a media object to be scanned (fig. 3, col. 1, lines 55-59), and an element for generating an optical pattern when scanned in the scanner system (fig. 3, col. 2, lines 1-11).

Regarding claim 2, Huang discloses the template according to claim 1, wherein the template further comprises an insert area for receiving a transparent media therein (fig. 3, col. 1, lines 55-59).

Regarding claim 5, arguments analogous to those presented for claim 1 are applicable to claim 5.

Art Unit: 2622

Regarding claim 6, Huang discloses the template according to claim 1, wherein the optical pattern is comparable to one or more reference patterns stored in a computer (col. 2, lines 1-15).

Regarding claim 7, Huang discloses the template according to claim 6, wherein the computer directs the scanner system to execute a scan routine upon determining a match between the optical pattern and one of the reference patterns (col. 2, lines 27-42).

Regarding claim 18, arguments analogous to those presented for claim 5 are applicable to claim 18.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang et al. (U.S. Patent No. 5,694,315).

Huang does not disclose expressly a tab connected to an edge of the template body.

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to connect the tab to the edge of the template. Applicant has not disclosed that the tab provides an advantage, is used for a particular purpose or solves a stated problem. Therefore, it would have been obvious to one of ordinary skill in this art to modify Huang's apparatus to obtain the invention as specified in claims 4 and 19.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (U.S. Patent No. 6,850,344) and further in view of Huang et al. (U.S. Patent No. 5,694,315).

Regarding claim 13, Chang discloses a scanner system for optically scanning a media, the scanner system comprising: a reflective scanner comprising a platen, a lamp, an optic system and one or more photosensitive devices; a transparent media adapter comprising a housing and operable to backlight a transparent media; and a template comprising an element for generating an optical pattern when scanned in the scanner system (figs. 1 & 2, col. 3, lines 41-58). Huang discloses a template adapted to receive a media for scanning (fig. 3). Therefore, it would have been obvious to a person of an ordinary skill in the art at the time the invention was made to combine Chang's invention with that of Huang to have the media for scanning secured in the template.

Regarding claim 14, Chang discloses the scanner system according to claim 13, wherein the scanner system is coupled to a computer, the computer storing one or more reference patterns each associated with a scan routine, the scanner system performing a reflective scan over a predefined distance of carriage translation and transmitting imaged data obtained by the reflective scan to the computer, the computer operable to compare the imaged data with the reference patterns (figs. 1 & 2, col. 3, lines 41-58).

Allowable Subject Matter

Claims 3, 15, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
